## C Summit 2022: The Business of Impact

How can we create **more coherence** between business and impact agendas? How can we harness the power of **deploying capital collectively**?

C Summit 2022 takes these **fundamental questions** as a starting point to explore different ways for corporate social investors to make their impact **faster and bolder**.

**Flagship gathering for corporate social investors in Europe.** At the C Summit we convene 150 top European corporate social investors in search for the most effective ways to advance their social impact by strategically leveraging corporate resources. In 2022 we go further to build more impact and more synergies with an extended format and new audiences: **the Impact Week**.
